Gonzalo Bianchini

Full Stack Web Developer

Santa Fe, Argentina | gonzalobianchini01@gmail.com | linkedin.com/in/gonzalo-bianchini | github.com/GonzaBianchi

PROFESSIONAL SUMMARY

Full stack web developer with a Higher Technical degree in Software Development. I work on a public-sector development team using PHP, Symfony and PostgreSQL, and build applications with TypeScript and JavaScript in Astro, React, Angular and Node.js (Express). I focus on interoperable, efficient, well-organized and scalable systems, and on designing fast and secure solutions to each problem. I also have experience with Java and Spring Boot, and I am comfortable on Linux, automating repetitive tasks.

EXPERIENCE

Full Stack Web Developer

Santa Fe Provincial Government, Ministry of Public Works | August 2025 – Present

- Development and maintenance of multiple web systems for the development team, using PHP, Symfony, Doctrine and PostgreSQL, with Twig and Bootstrap interfaces.
- Main owner of the subsidy expense-reporting system: I designed it and am in charge of its maintenance and updates. It includes invoice validation against the national tax authority (ARCA) and electronic signatures.

PROJECTS

Full Bot

Discord bot with a web dashboard | 2025 – 2026

Bot that awards experience and levels for taking part in chat, with achievements, automatic roles and birthday greetings. Each server configures it from its own web dashboard.

Technologies: Node.js, Discord.js, Express, React, MongoDB, Render

github.com/GonzaBianchi/full-bot · runichexcore.vercel.app

Airbnb

I2T Bootcamp, Santa Fe (team project) | September – November 2024

Short-term rental marketplace. I worked across the full stack: building and improving endpoints, developing services and integrating them into the interface components.

Technologies: Angular, Spring Boot, Spring Security, Hibernate, MySQL

github.com/GonzaBianchi/Airbnb

Bianchini Fletes Booking System

Personal project and final degree project | August – November 2024

Web booking application for a fictional freight company: users book a day and time slot, and the administrator manages vehicles, prices and bookings.

Technologies: React, Vite, Tailwind CSS, Node.js, Express, MySQL, Axios, Passport, Bcrypt

github.com/GonzaBianchi/ReactVite

Fitness Elite Gym

Node.js course, Codo a Codo (team project) | March – July 2024

Website for a fictional gym with features for users and administrators. I built both back end and front end, creating endpoints and consuming them from the interface.

Technologies: HTML, CSS, JavaScript, Node.js, Express, Passport, Bcrypt

github.com/GonzaBianchi/Fitness-Elite-Gym

Lottery Manager

I2T Bootcamp, Santa Fe (team project) | September – November 2024

Lottery management application: draws, prices per draw type, days and times.

Technologies: Visual Basic 6, MySQL

github.com/GonzaBianchi/TPI-VB6-I2T

TECHNICAL SKILLS

Programming languages: TypeScript, JavaScript, PHP, Java, SQL, C++, Visual Basic 6

Front-end: Astro, React, Angular, Tailwind CSS, HTML, CSS

Back-end: Node.js, Express, Symfony, Spring Boot, Spring Security, Spring Cloud, Hibernate, Doctrine, REST API

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, Linux, Postman, Trello, Notion, artificial intelligence

Methodologies: Scrum

Spoken languages: Spanish (native), English (advanced), Portuguese (advanced)

EDUCATION

Higher Technical Degree in Software Development
Instituto de Estudios Superiores, Santa Fe, Argentina | 2022 – 2024

Computer Engineering (coursework, not completed)
Facultad de Ingeniería y Ciencias Hídricas, Argentina | 2020 – 2021

High School Diploma in Economics and Administration
EESOPI 3015 San Roque, Argentina | 2015 – 2019

COURSES AND TRAINING

- Google IT Support, Coursera
- Foreign language training and certification program (English)
- Node.js, Codo a Codo
- Learn to doing training program, I2T
- React course and introduction to Next.js, I2T
